# Jabberwocky

## *Lewis Carroll*

'Twas brillig, and the slithy toves  
Did gyre and gimble in the wabe;  
All mimsy were the borogoves,  
And the mome raths outgrabe.

"Beware the Jabberwock, my son!  
The jaws that bite, the claws that catch!  
Beware the Jubjub bird, and shun  
The frumious Bandersnatch!"

## $\text{T}_\text{E}\text{X}$ , $\text{A}_\text{T}_\text{E}\text{X}$ , and Beamer

$\text{T}_\text{E}\text{X}$  is a programming language for the typesetting of documents. It was created by Donald Erwin Knuth in the late 1970s and it is documented in *The  $\text{T}_\text{E}\text{X}$ book* [1].

In the early 1980s, Leslie Lamport created the initial version of  $\text{A}_\text{T}_\text{E}\text{X}$ , a high-level language on top of  $\text{T}_\text{E}\text{X}$ , which is documented in  *$\text{A}_\text{T}_\text{E}\text{X}$  : A Document Preparation System* [2]. There exists a healthy ecosystem of packages that extend the base functionality of  $\text{A}_\text{T}_\text{E}\text{X}$ ; *The  $\text{A}_\text{T}_\text{E}\text{X}$  Companion* [3] acts as a guide through the ecosystem. In 2003, Till Tantau created the initial version of Beamer, a  $\text{A}_\text{T}_\text{E}\text{X}$  package for the creation of presentations. Beamer is documented in the *User's Guide to the Beamer Class* [4].
